LEGACY EDUCATION
creating a legacy of the mind

THINK AND CREATE LEGACY EDUCATION

About

A 7mountain Strategy Leadership- Graduate School for Key Influencers with a passion to address lack of leadership and scarce skills in Africa, Reaching, Equipping and Releasing over 20 million marketplace leaders in Africa in every 7years.

Vision:

To Create a Legacy of the Mind

Mission:

To Create a Knowledge Bank that will serve as a Hub for Thought leadership development for nations in Africa. We will do this by mentoring, counselling, coaching and training students, workers, professionals, entrepreneurs, men and women in all walks of life, to be effective and transformational leaders in all spheres of influence.

Foster a culture of entrepreneurship in homes, schools and universities. Include entrepreneurship in science-related fields of study.

Recessions provide business opportunities; policies must be formulated to encourage and support would-be entrepreneurs.

Create our own culture of entrepreneurship: redefine the model, promote an effective return capital and private equity investment providing structure for entrepreneurial education and skills.
